

## CSI Business Intelligence Solutions

### Cognos

#### The only software that delivers the full range of Business Intelligence features

Cognos business intelligence solutions harness corporate data to help you see the factors that drive your business so you can make faster, more informed business decisions.

They unite information from across your organisation to give you a consistent, unified view of your business processes.

Cognos lets you share information with customers and your supply chain to forge highly effective, lasting business relationships.

With the Cognos Platform you gain sophisticated visualisation and scorecarding, reporting, analysis, and ad hoc query capabilities as well as pre-packaged e-Applications.

You can create BI-ready data marts. Give suppliers, partners, and customers a single point of personalised access to information through your portal interface.
