

CSI at a Glance

With over 100 staff supporting a wide range of customers, across a number of sectors, our experience and expertise can help businesses reach their IT goals. Unlike most system integrators, CSI has the in-house technical skills to develop and manage all aspects of networks, systems, applications and e-Business solutions.

By focusing on four areas of business, we can be proactive in working with our clients to provide solutions that support their immediate and future business needs, that are both flexible and scalable:-

- **Infrastructure Solutions**
- **Application Solutions**
- **Application Integration**
- **e-Business Solutions**

CSI prides itself on obtaining the highest level of accreditations with its partners, in order to provide technical excellence and exceptional customer service. By demonstrating expertise in providing e-Business solutions, CSI was the first e-Business Partner in Europe and has achieved IBM's Premier Business Partner status.

CSI appreciates that our customers investment in IT infrastructure, applications and e-Business needs to be justified. With this in mind, CSI has a proven methodology to identify and demonstrate how a return on investment can be achieved.
